

Fairmont State Parking Garage

The new Fairmont State Parking Garage in Fairmont, WV was a Design/Build project with a contract amount of \$9,200,000. The garage is a 269,000 square foot facility with 923 parking spaces. The structure was built in a ravine, a retaining wall and slab on grade had to be constructed to manage the terrain. The walls and slab were used to create a stair-step effect along the bank.

The total precast structure was built with a double-tee system and precast columns and beams as the support structure with architectural reveal details on the spandrels. The parking structure includes 645 pieces of structural and architectural precast with over 256,000 SF of concrete.
